## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Cooney et al. (6,066,577).

Cooney et al. (6,066,577) discloses, as to claim 11, an IC comprising an interconnect structure having a dielectric layer 28 (col. 4, line 66). The dielectric layer 28 includes at least a portion of a hard mask layer 22, wherein the hard mask 22 has a patterned organic polymer film (col. 5, line 13) such that a portion of the patterned organic polymer film is fluorinated (col. 5, line 7). See figure 2F.

As to claim 12, Chiang et al. (6,309,956) discloses the patterned organic film 22 is a patterned low-K organic polymer film. (The examiner notes that fluorinated silicon dioxide and/or CxFy are low K materials). See column 5, lines 7-13.

As to claim 13, the surface has fluorinated portion 22 and the interior 28 has non-fluorinated portion. See column 2, lines 60-68 and col 5, line 51.

As to claim 14, depending on the selection of materials for the K value of the fluorinated portion (col. 5, lines 7-13), that k value may be less than the K value of the non-fluorinated

Art Unit: 2814

portion (col. 4, lines 66-67). (For example, the K value for the fluorinated silicon dioxide is less than the K value for the non-flourinated silicon nitride).

***Response to Arguments***

3. Applicant's arguments with respect to claims 11-14 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vikki H Trinh whose telephone number is 703-308-8238. The examiner can normally be reached on Mon.-Tues, Thurs.-Fri..
